Attorney Docket No. 79287 Qd;

Application No. 10/661,177 Reply to Office Action of April 7, 2006

## **Amendments to the Claims**

This listing of claims will replace all prior versions, and listings, of the claims in the application:

- 1. (Cancel)
- 2. (Amended) The battery backup apparatus of claim  $\pm 10$  comprising an audible signaling device.
- 3. (Amended) The battery backup apparatus of claim 2 comprising <u>an</u> apparatus for enabling the audible signaling device in response to current flowing from the battery to the <del>first</del> backup port <u>DC voltage supply</u> via the unidirectional isolation device.
- 4. (Amended) The battery backup apparatus of claim  $\pm 10$  comprising one or more visual signaling devices.
- 5. (Amended) The battery backup apparatus of claim 1 10 wherein the battery charging device comprises circuitry for limiting a current applied to the first battery terminal.
- 6. (Amended) The battery backup apparatus of claim 5 wherein the circuitry for limiting, limits the current to an amount less than a maximum amount expected from the barrier movement operator.
- 7. (Amended) The battery backup apparatus of claim  $\frac{1}{2}$  comprising cut out circuitry for disconnecting the first battery terminal from the unidirectional isolation device.
- 8. (Amended) The battery backup apparatus of claim ± 10 comprising cutout circuitry for disconnecting the first battery terminal from the battery charging circuit.

Docket No.:5569/79287

Application No. 10/661,177 Reply to Office Action of November 6, 2006

## **AMENDMENTS TO THE CLAIMS**

Please amend claims 6 and 10 as set forth below. This listing of claims replaces all prior versions, and listings, of claims in the application:

## **Listing of Claims**

- 1. (Canceled)
- 2. (Previously presented) The battery backup apparatus of claim 10 comprising an audible signaling device.
- 3. (Previously presented) The battery backup apparatus of claim 2 comprising an apparatus for enabling the audible signaling device in response to current flowing from the battery to the DC voltage supply via the unidirectional isolation device.
- 4. (Previously presented) The battery backup apparatus of claim 10 comprising one or more visual signaling devices.
- 5. (Previously presented) The battery backup apparatus of claim 10 wherein the battery charging device comprises circuitry for limiting a current applied to the first battery terminal.
- 6. (Currently amended) The battery backup apparatus of claim 5 wherein the circuitry for limiting, limits the current to an amount less than a <u>predetermined</u> maximum amount.
- 7. (Previously presented) The battery backup apparatus of claim 10 comprising cut out circuitry for disconnecting the first battery terminal from the unidirectional isolation device.
